MDM:

A STORY FULL OF COLOUR

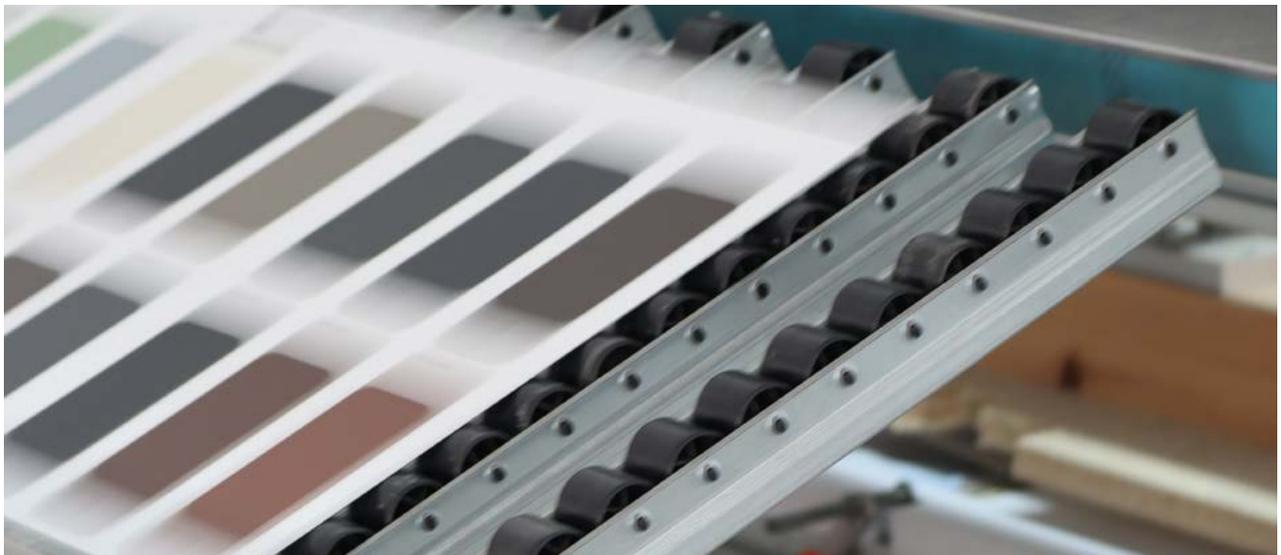

MDM is one of Europe's leading specialists in the production of colour fan decks and sample folders for the aluminium sector.

Founded 15 years ago as a small workshop assembling kits for flyscreens and home furnishings, the company now serves over 500 clients across Italy and Europe who trust its working methods and ability to respond precisely to every request.

In addition to colour **sample production**, MDM offers a range of complementary services — from **epoxy powder coating** to direct **printing on panels**, from resin **adhesive labels** to **customised cases** with shaped foam interiors, from **display systems** to branded **doormats** and carpets.

One thing we can state clearly for every service we provide: we always pursue the highest quality.

TAILORED SOLUTIONS TO ORGANISE AND COMMUNICATE YOUR PRODUCT IDENTITY WITH PRECISION AND STYLE

MDM Campionari designs and manufactures professional tools for the presentation, organisation and enhancement of colours.

From colour fan decks to sample folders, from bespoke powder coating to personalised doormats and high-quality printing, every product is custom-designed to meet

the needs of manufacturers, designers and marketing departments.

We work with **artisan precision** and **industrial vision**, combining aesthetics and functionality.

Reliability, attention to detail and production flexibility are our key strengths.

Because every colour deserves its own space.

COLORS SAMPLES

COLOUR FAN DECKS & SAMPLE FOLDERS

Colour fan decks and sample folders are essential tools for professionals working in powder coating, surface finishing and industrial materials.

For over 15 years, MDM Campionari has been designing and producing tailor-made aluminium colour collections for companies that demand accuracy, visual consistency and a distinctive identity.

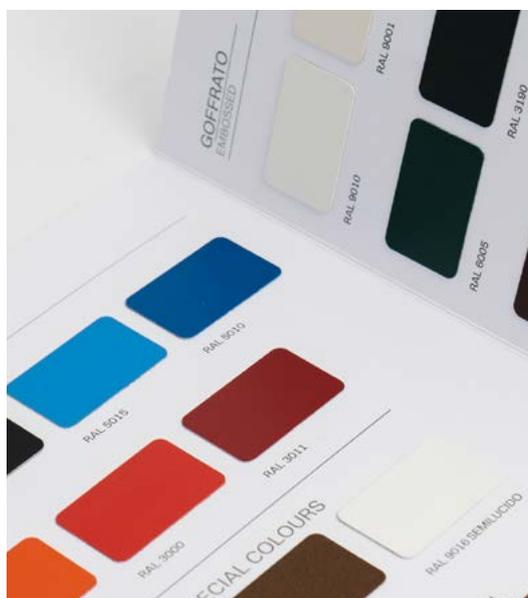

We manage the entire production cycle in-house, ensuring full control over quality, timing and repeatability.

Each fan deck is a unique product, designed to meet specific aesthetic and functional criteria.

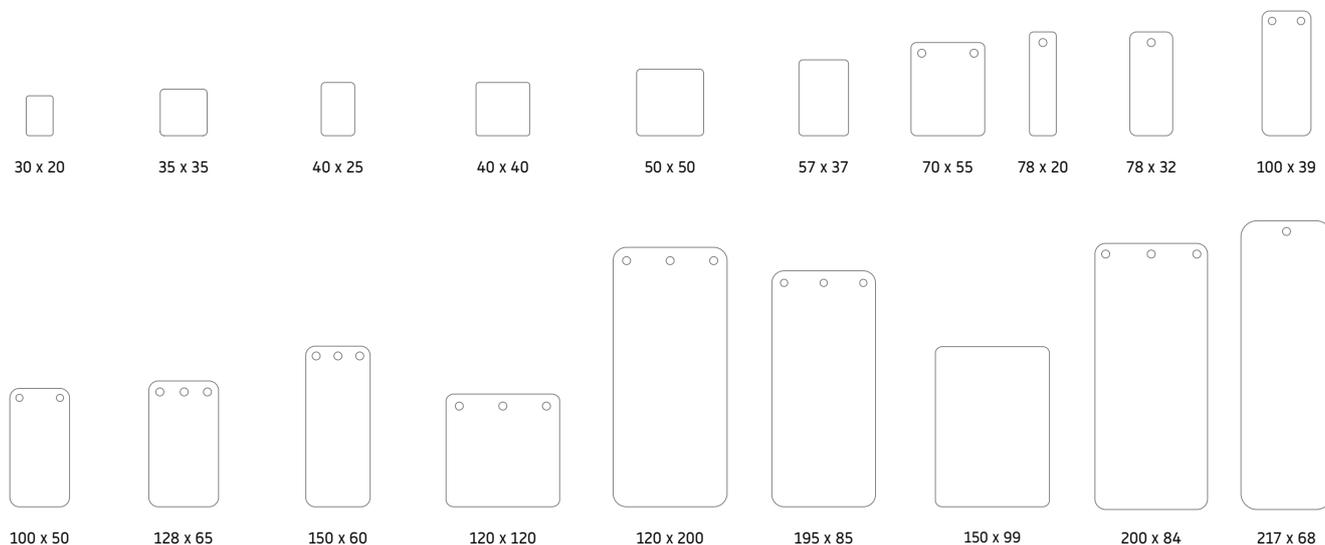

Our goal is to provide a **robust, well-organised and brand-consistent tool** that facilitates both sales and technical consultation.

PRODUCTION STEPS:

01. Graphic design
02. Offset printing
03. Powder coating
04. Cutting and trimming
05. Marking
06. Custom cover or case
07. Assembly

METAL SWATCHES

○ All swatches formats are suitable for colour charts, but only those with holes can be used to make colour swatches.

The table shows some of the available formats. **PLEASE NOTE:** the images of the sheets are for illustrative purposes only.

POWDER COATING

The modern in-house powder coating plant at MDM Championari completes our value proposition, providing maximum flexibility and industrial-grade quality — even for small batches, starting from a single piece.

Ideal for sampling, prototypes and small-to-medium production runs, it allows for rapid colour changes without limits across **RAL** or **NCS** scales.

The facility handles items up to **3.0 × 2.5 × 2.0 m**, ensuring uniform finishes, excellent adhesion and high mechanical resistance.

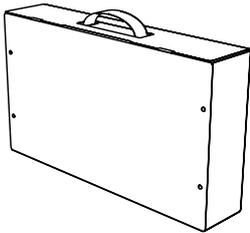

Every cycle is digitally monitored to guarantee full **traceability, consistent quality and optimised timing**, maintaining surface finishes to the highest industry standards.

A truly tailored solution for those who require precision, versatility and flawless results, even in micro-production

in every **shade**

SAMPLE CASES

Fully customisable dimensions

After more than three years of research and development — driven by customer needs — MDM has created the first **“alupolytechnic” case**, made from a combination of **aluminium** and **polypropylene**.

Each case is produced to order, even for small quantities, and can be manufactured entirely in polypropylene, entirely in aluminium, or as a mixed version.

The interiors can be shaped in **foam or PVC**, ideal for housing all types of samples — profiles, accessories and more.

We use 1.5 mm polypropylene and 1.2 mm aluminium.

All surfaces are fully customisable: both materials can be printed, and aluminium parts can also be powder-coated.

Unlike traditional cardboard cases, the “alupolytechnic” structure ensures far superior durability: it is water- and humidity-resistant, scratch-resistant, and tear-proof.

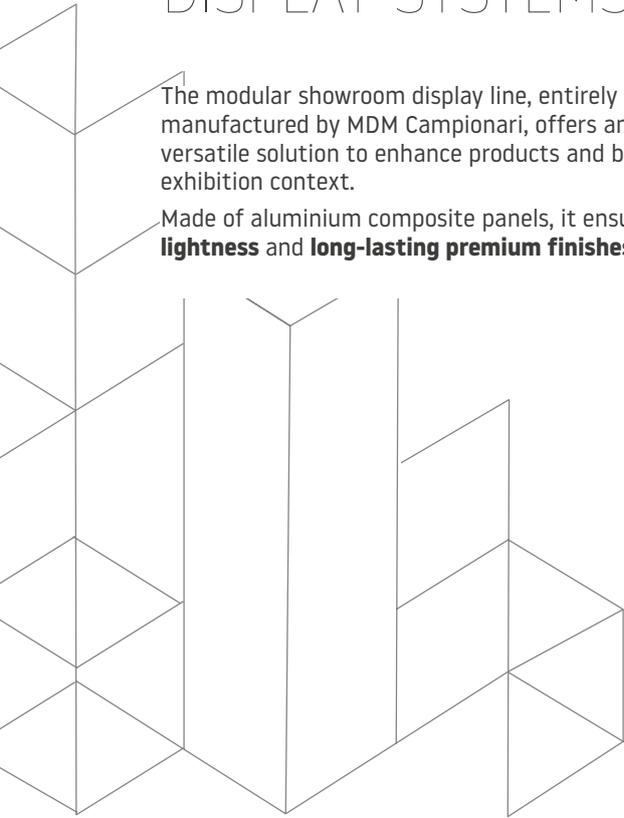

Thanks to our machinery — **CNC cutting systems, laser cutters, shears, bending machines, UV printers, sewing machines and powder coating plants** — we can produce **fully functional, tailor-made cases** that meet every customer requirement.

A **unique product on the European market**, developed by our **Research & Development department**.

MODULAR DISPLAY SYSTEMS

The modular showroom display line, entirely designed and manufactured by MDM Campionari, offers an elegant and versatile solution to enhance products and brands in any exhibition context.

Made of aluminium composite panels, it ensures **strength, lightness** and **long-lasting premium finishes**.

Fully customisable in size and graphic layout — with corporate logos and visuals — the display becomes a highly versatile communication tool, ideal for **showrooms, trade fairs and retail spaces** seeking a coordinated, modern and professional image.

One **module**,
endless possibilities.

CUSTOM DOORMATS

zerbini.shop

Zerbini.shop is the MDM Campionari division specialising in **custom-made inlaid doormats** in synthetic coir.

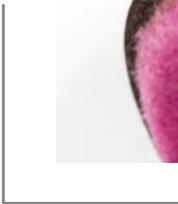

Each doormat can be fully personalised, with **24 base colours** and **24 inlay colours** available.

Produced in **polyethylene and natural rubber**, the mats are high-quality and suitable for both indoor and covered outdoor use.

Manufacturing takes place entirely at our facility, using **CNC cutting systems** combined with meticulous manual assembly and finishing.

Our product range also includes **natural coir mats for interiors**, **PVC loop mats for outdoor use**, and **absorbent mats**.

MDM Campionari is an **official ZERMAT distributor**.
